github.com/winnie080700

4+ years of experience architecting API-driven systems, internal platforms, migration tooling, and AI-integrated workflows. Strong backend focus in C# / .NET with hands-on delivery across React, Angular, TypeScript, Java, Spring Boot, MySQL, Redis. Known for turning ambiguous business workflows into maintainable software, modernizing legacy systems, reviewing code quality, and resolving issues with practical engineering judgment.

Core Skills

Backend	C#, ASP.NET, RESTful API, Java, Spring Boot, Python, Node.js, NestJS
Frontend	React, Angular, Vue, TypeScript, JavaScript, Tailwind CSS, Bootstrap, jQuery
Database	MySQL, MSSQL, PostgreSQL, Redis, Supabase
Tools	Git, GitHub, GitLab, Jira, Docker, Jenkins, AWS S3, Vercel, Postman, Navicat, IIS Express
Practices	API design, code review, code quality, prompt engineering, troubleshooting, team collaboration

Working Experience

Senior Software Developer

Updev Labs Sdn.Bhd. | Bangsar South, KL | July 2023 - Present

- Architected and implemented API-driven business systems across internal platforms, migration tools, AI automation, and third-party service integrations.
- Led backend design and implementation for a Telegram AI customer support bot in C#, automating user query handling and improving response workflows through prompt enhancement.
- Engineered an internal financial management system with C# RESTful APIs and React, supporting audit workflows, invoice processing, and internal operational visibility.
- Architected Google Drive data retrieval and Cloudflare D1 to MySQL migration CLI tools, covering export, import, validation, and data migration workflows.

-
- Modernized legacy Python services into C# architecture aligned with company standards for maintainability, performance, and long-term support.
 - Reviewed code, upheld coding standards, diagnosed production issues, and collaborated with cross-functional teams to deliver maintainable software.

Stack: C#, ASP.NET, Java, Spring Boot, Python, React, Angular, MySQL, Redis, Docker, Jenkins, AWS S3

IT Specialist

Original Intelligence Sdn. Bhd. | Petaling Jaya, Selangor | January 2022 - July 2023

- Enhanced and extended business applications across workshop management, inventory tracking, e-commerce, and HR workflows.
- Architected and implemented a car workshop management system and mobile application, covering web workflows and Xamarin Forms mobile delivery.
- Maintained and improved inventory tracking, bookstore e-commerce, and human resources management systems as requirements evolved.
- Updated project documentation, supported testing and deployment, and independently resolved application defects and technical issues.

Stack: VB.NET, ASP.NET, ASP.NET MVC, JavaScript, HTML, CSS, Bootstrap, jQuery, Xamarin Forms, MSSQL, IIS Express, Remote Desktop, Kotlin

Selected Project Experience

Telegram AI Customer Support Bot: Architected a C# Telegram bot that automates customer query handling and improves AI response quality through prompt workflow refinement.

Internal Financial Management System: Engineered C# RESTful APIs and React workflows for audit support, invoice processing, and internal financial operations.

Cloudflare D1 to MySQL Migration CLI: Built migration tooling for schema export, data import, validation, and database transfer from Cloudflare D1 into MySQL.

Google Drive Data Retrieval CLI: Created AI-assisted CLI tooling for retrieving structured data from Google Sheets and Docs.

Risk-Weighted Engagement System: Architected and implemented system workflows using Angular, TypeScript, NestJS, MySQL, Redis, and Scalar.

Splity: Created a bill-splitting web application using Next.js, Supabase, PostgreSQL, Tailwind CSS, and Vercel.

Education & Achievements

Bachelor of Information Technology (HONS), Internet Technology

Tunku Abdul Rahman University College (TARUC) | February 2020 - January 2022

- CGPA of 3.66
 - Merit Academic Achievement Award
 - President & Dean List
 - MUET Band 4
 - Interactive Gaming Society (IGS) Committee 2019
 - Adjustment To Campus Life (ATCL) Crew Member 2018
-
